Coastal Health District Hurricane Registry Application

Important Notes

In an actual emergency, coordinating agencies will try to provide the necessary evacuation assistance, but this cannot always be assured.

- To best guarantee personal safety, individuals should make plans and follow government emergency evacuation guidelines.
- A personal caregiver <u>SHOULD</u> accompany you to the emergency shelter. The caregiver <u>MUST</u> be able to provide the same care at the shelter as is delivered at home. This may be for an extended period, 4-7 days or longer, depending on the event.
- Depending on your health status you may be transported to an American Red Cross emergency shelter or admitted to an inland healthcare facility.
- Shelters will provide no more than 20-40 square feet of space. (example: a cot with 1-2 feet of walk around space)
- Nursing Homes, Assisted Living Facilities, Personal Care Homes and In-patient Hospice facilities are responsible
 for the evacuation of their residents. Residents living in a nursing home, assisted living facility or personal care
 home <u>MUST</u> follow the emergency plan established by the facility's administration.
- Residents under the care of in-home Hospice and Home Health Care Agencies should work with their providers to establish an emergency plan. This includes pre-determined destination and contact Information.
- There may be a cost associated with care or transportation if the client is placed in a healthcare facility
